Intelligent search that understands your customers

1. Index your webpages

Easily index all of your webpages across all domains

2. Fully customized experience

Easily design the look and feel of your search experience

3. Embed anywhere

Integrate in seconds with one line of code

4. Review and Optimize

Access insights into user needs & search performance

Zoovu's Search Studio supercharges your search and discovery experiences through:

Index multiple content sources

Centralized access to various content sources such as websites, knowledge bases, and product catalogs.

Semantic discovery enablement

Recognize synonyms, slang and imprecise spellings with Zoovu's proprietary ontology library and NLU

Full control of search results

Easily adjust and optimize featured results for campaigns or product launches, without the help of developers.

Multi-language support

Handle search queries in any language for quick and easy global deployment.

Comprehensive reporting

Access reporting dashboards that reveal what search behavior leads to the best business results.
